

Team Mix-Tape Musician's Assistant Mixer Plans to Distribute Questionnaire

We plan to give out these questionnaires to a wide variety of students on campus. These students will differ in age, gender, ethnicity, and majors to get a good diverse response from this questionnaire. We will set a strong focus on Music majors, since they are most likely best to understand music theory. We will disperse these questionnaires amongst the Music students, by standing in front of the music building on campus and ask for those willing to fill out the questionnaire to do so. Since one of our team members is in a fraternity, we will also utilize the age differences as well as different majors in his fraternity as an asset to the results of this questionnaire.
